

6516207637.txt

I am a cross country tractor trailer driver, I sometimes cross 4 or 5 states in a day. My XM Radio stays on station the whole time from sea to shining sea, saving me from having to take my hands from the wheel and my eyes from the road to retune the radio. Local trafic and weather station would be a great asset to me, I would know what I am driving into and knowing what areas to avoid.  
Thank you.
